SUMMARY

Business analyst and techno-functional consultant with 10 years in capital markets technology — eight platform implementations across six countries delivering trading, OMS and wealth platforms, followed by a direct advisory contract with BBVA on platform capability and core system integration. Works the full line from business to build: requirement discovery and BRD/FRD authoring with stakeholders, solution design bounded by platform and regulatory constraints, interface and data migration work with engineering teams, and delivery through SIT, UAT and release. Equity derivatives, structured products, fixed income, FX and order lifecycle; NISM certified in Equity Derivatives and Fixed Income Securities.

SKILLS

Business & advisory Requirement discovery and stakeholder elicitation · BRD, FRD and FSD authoring · User stories and product backlog management · Platform capability assessment · Gap and constraint analysis · Regulatory limitation assessment · Product design and configuration · Vendor–client interface management · Sprint planning and review · SIT and UAT coordination

Technical & platform FinIQ OMS and structured products suite · Front, middle and back office workflows · Core banking integration · API and interface design · Data migration · SQL · JIRA · Release management · Production support

Products & markets Equity derivatives · Equity structured products · Bonds · T-bills · Certificates of deposit · Mutual funds · FX — private banking, retail brokerage, wealth, treasury

EXPERIENCE

BBVA | Mar 2025 – Sep 2026

Techno-Functional Consultant — independent contract · Remote

- Engaged directly by the bank to assess FinIQ platform capability against business requirements and map integration paths into core banking systems — data flows, interface points, dependencies.
- Translated requirements into solution designs bounded by platform capability, regulatory constraints and identified limitations, flagging gaps requiring workaround or customisation.
- Sole interface between bank business stakeholders and vendor technical teams across multiple workstreams.

FinIQ Consulting | Aug 2016 – Mar 2025

Senior Business Analyst / Product Lead · Dubai, UAE — onsite delivery in Kuala Lumpur, Singapore and Jakarta

Eight platform implementations across six countries — two of Dubai's largest banks, a London-headquartered global bank across APAC, the Middle East, the UK and China, and top-tier banks in Singapore, Malaysia, Indonesia and India. Client names available on request. Engagements ran concurrently; delivery in agile sprints with the backlog maintained and prioritised in JIRA.

- **Requirements and product design** — requirement gathering, BRD/FRD authoring and user stories for front and back office OMS across equities, bonds, mutual funds, T-bills and certificates of deposit; private banking, retail and brokerage segments (UAE, India).
- **Order and trade lifecycle** — order placement, execution and migration flows, front-to-back reconciliation, and equity structured products across the full order lifecycle (UAE, India, Singapore; global bank across APAC and China).
- **Integration and migration** — interface and API configuration across multiple upstream and downstream systems; high-volume migration of client and position records with zero data integrity incidents (Indonesia, UAE).
- **Release delivery and client interface** — weekly release and testing cycles across three regions, SIT and UAT resolution, enhancement backlog and sprint planning, primary client contact over four years; platform demonstrations and project costing supporting business development (global bank across APAC, the Middle East and the UK; Singapore, UAE, Malaysia, Indonesia).

Engagement record

Dubai's largest banking group, government-owned — Business Analyst | Jan 2023 – Mar 2025 — led platform build for equity, bond and mutual fund trading across private banking and retail, spanning multiple group entities; owned requirement gathering, product design and BRD/FRD authoring for front and back office OMS; interface integration and data migration with bank IT and vendor teams.

UAE's oldest privately-owned bank — Business Analyst / Product Configuration | Mar 2021 – Mar 2025 — designed order placement, migration and trade lifecycle flows for bonds, equities, T-bills and certificates of deposit; configured the product range to production sign-off; high-volume client and position migration with zero data integrity incidents; primary client contact for SIT and UAT resolution, enhancement backlog and sprint planning over four years.

Indonesia's largest state-owned bank — Business Analyst / Product Lead | Mar 2022 – Jan 2024 · Onsite, Jakarta — end-to-end requirements, demonstrations and project costing for a bond trading platform; integration across multiple upstream and downstream systems; FX platform demonstrations supporting the bank's business development pipeline.

Top-four Indian private-sector bank — Business Analyst / Product Lead | Mar 2022 – Jan 2024 — requirement gathering and product design for a back office OMS supporting retail API trading platforms; order workflow and front-to-back reconciliation.

London-headquartered global bank, emerging-markets focused — China business — Business Analyst / Release Delivery | Feb 2020 – Mar 2021 • Onsite, Kuala Lumpur — release delivery and requirement analysis for equity structured products; interface and API platform configuration across the full order lifecycle.

One of Singapore's three largest banks — Business Analyst / Release Delivery | Feb 2019 – Feb 2020 • Onsite, Singapore — release management for bond and equity order placement and execution systems; integration across multiple interfacing systems.

London-headquartered global bank, emerging-markets focused — APAC, Middle East & UK — Business Analyst / Release Delivery | Feb 2017 – Dec 2019 • Onsite, Kuala Lumpur — weekly release and testing cycles for counterparty pricing and order placement across three regions; business and testing support for equity structured products.

Malaysia's second-largest banking group, ASEAN-wide — Quality Analyst / Product Configuration Support | Aug 2016 – Feb 2017 — regression and pre/post-release testing for equity order systems; configuration support for user-defined product structures.
